**Discontinued Pump Model D2C – 316 SS**

Effectively immediately the 2 inch 316 SS Diaphragm Pump – model number D2C-316SS will no longer be available.

The 316 SS Head was originally used on the Hydraulic Diaphragm Pump D F2. The 316 SS components were utilized for the high pressure requirements of the DF2. This pump was discontinued 15 years ago and Sidewinder has now depleted inventory of these components.

All repair components, except for the pump head part number #112-2, will continue to be available.

The two inch PVC diaphragm pump, model number D2C-PVC will continue to be offered. For applications requiring alternative materials of construction please contact Sidewinder for availability and pricing.

Any questions please contact me.

Regards,

Guy Chachere
