Baker Petrolite Scale Inhibitors

SCW-4013 & SCW 356

Sidewinder Pumps has had inquiries on seal material compatible with Baker Petrolite Scale Inhibitors SCW-4013 & SCW-356 and plunger material compatibility.

Baker Petrolite's Technical Support division has provided following information for elastomer compatibility with SCW 4013 & SCW-356 Inhibitor

Seal Material	Acceptable
Teflon	Yes
Viton	Yes
Buna N	No
Neoprene	No
Hipalon	No

The Ph reading for both of these products is from 4.8 to 5.8, Baker Petrolites Technical Support Division has recommended using ceramic plungers for applications with either of these scale inhibitors.
